

GHGI PR Draft Comments on Oil and Gas

Source (Commenter)	Comment	Final inventory
Transmission Pipeline Blowdowns (AGA, INGAA)	<ul style="list-style-type: none"> -Use year-specific data for 2016 and 2017 -Apply previous (GRI factor) for other years 	<ul style="list-style-type: none"> -Use year-specific data for 2016 and 2017 -GRI factor for 1990-2015 (PR draft used blended 2016-2017 for all years) -Very small impact on estimates
Gathering and Boosting (API, GPA)	<ul style="list-style-type: none"> -Wait for information from upcoming studies and next year of GHGRP to include CO₂ from G&B (API) -Comments conflate GHGI with OOOOa analysis, and conflate gathering with production, transmission, and distribution (GPA) 	No changes, same as PR
HF Oil Well Completions (API)	-Agrees with update to use GHGRP data	No changes, same as PR
Refineries (API)	-Continue to use GHGRP, review new data, do not use recent study of 3 refineries	No changes, same as PR (in PR draft we noted availability of the study but did not propose to use it)
Offshore Platforms (API)	<ul style="list-style-type: none"> -Update to use latest BOEM data in future GHGI -Detailed comments on future updates for offshore 	No changes, same as PR
Sector Total CH ₄ (EDF/CATF)	<ul style="list-style-type: none"> -Describes Alvarez et al. study -Do not use component-level data unless validated with empirical site- and basin-level data 	No changes
